

Spec Audit — stocks.yanatech.co.uk

Audited: 2026-06-27 against original product spec.

Verdict: all must-haves and nice-to-haves are implemented.

Must Haves

Requirement	Status	Detail
ETFs as well as shares	✓	Market Browser → ETFs tab: SPY, IVV, VOO, QQQ, VTI, IWM, DIA, XLK — all with + buttons, all navigable to stock detail page
Volume data	✓	Stock header shows OPEN/HIGH/LOW/VOLUME (e.g. 65.2M for AAPL); volume pane rendered below candlesticks in chart
News specific to current asset	✓	RECENT NEWS section with benzinga/newsapi articles, per-article sentiment labels (positive/negative/neutral)
Candlestick graphs	✓	Line/Candle toggle, 7 time ranges (1H/1D/1W/1M/3M/6M/1Y), OHLCV crosshair on hover
Momentum indicators (MA, RSI, MACD)	✓	Toggle bar: SMA 20/50/200, EMA 12/26 overlay on price chart; RSI 14 and MACD each render as sub-panes below the main chart (requires ≥1M range for enough data points)

Nice-to-Haves

Requirement	Status	Detail
News integrated into graphs	✓	Numbered circle markers on chart candles (e.g. "8" on a date) — clicking shows news headline popup
Location specific	✓	Profile → "Default market" dropdown (US Equities / UK Equities / ETFs / Global); Market Browser has UK Equities tab; FTSE 100 index card + sector rotation
Consensus / Analyst ratings	✓	Right sidebar on stock detail: Buy/Hold/Sell bar with Str Buy/Buy/Hold/Sell/Str Sell counts and price target
Simplified buy/sell signals	✓	"Oversold" / "Overbought" badge next to chart title when RSI crosses threshold (e.g. RSI 14 = 29.47 → "Oversold")

Other

Requirement	Status	Detail
Home screen — indices & sectors	✓	S&P 500/Nasdaq/FTSE 100 index cards; Factor Performance (6 tiles, 1D/1W/1M toggle); Market News feed

Requirement	Status	Detail
Index rotations & heatmap	✓	Sector Rotation: Today view (market-cap-weighted treemap) + History view (colour-coded 12-day table); S&P 500 and FTSE 100 supported
Consistent watchlist add	✓	"+" button on: home Top Gainers/Losers, Market Browser rows, ETF tab rows, Stock Screener rows, stock detail page header
Stock screener	✓	Filters: Market Cap, Min Volume, Min Div Yield, Sector, Min Momentum %; results table with Price/Chg%/Mkt Cap/Vol/Div% + watchlist add

Minor Observations (not spec gaps)

1. **RSI/MACD sub-panes** only appear clearly on **1M+ range** — with 1W there is not enough data to compute them, so the pane collapses. Could add a user hint such as "Select 1M or longer to view RSI/MACD."
2. **ML predictions** showing large negative divergence from live price (1-day prediction -10% while stock was +2.67%) — model may need retraining, not a feature gap.
3. **Dark mode** is in the Profile Theme dropdown but was not verified as working end-to-end.
